Measurements to Take How to find your size!

Neck

Measure around base of neck. Leave a little slack to breathe.

Chest/Bust

Measure around the fullest part with tape under arms. No puffing out the chest!

Waist

Measure around the natural waist line which is just about where your naval is. (or wherever it is you wear your pants)

Seat/Hips

Stand shoulder width apart and measure around the fullest part of your hips.

Inseam

Compare measurement with a similarly styled pant. Lay flat and measure from crotch to hem.

Arm/Sleeve Length

You may need a friend to help with this one. Place your hand on your hip and measure from the end of the shoulder, where the nobby bone sticks out, to the elbow and down to the outer wrist bone.

Unisex

These styles are flattering for both men and women. The sizes are based on men's measurements. Women may want to consider ordering a size smaller than usual.

Active

A fit that is true to the body's contours. RTW's K2N™ technology keeps its stretch for ever day's activities.

Classic

A fit that is designed for ease and comfort. Not oversized and not tight.

Sloungy

A fit that allows for ease of movement that hangs slightly away from the body.
